

IS YOUR ORGANIZATION READY FOR AGENTIC AI?

10 Questions to Assess Your Readiness

Agentic AI is reshaping how work gets done. But before you implement autonomous agents, take a step back. Use this quick checklist to assess if your organization has the foundations in place for safe, strategic deployment.

✔ Strategy & Alignment

Do you have a clear business goal that AI agents would support?

Have you mapped specific workflows where autonomy would add value?

✔ Talent & Culture

Are your teams trained to work with AI tools, not just use them?

Is there a culture of experimentation and feedback around new technologies?

✔ Governance & Risk

Do you have oversight processes in place for autonomous decisions?

Can you explain how an AI agent arrived at a decision (auditability)?

Do your policies account for bias, security, and compliance risks?

✔ Tech Infrastructure

Can your systems support real-time data access and secure integrations?

Do you have the right APIs and tooling to support agent actions across platforms?

✔ Leadership Commitment

Is there executive sponsorship and a plan for scale if the pilot succeeds?

If you answered "no" or "not sure" to 3 or more questions, you're not alone—but it's time to prepare.

Book a discovery call to explore how to move from experimentation to execution with clarity and confidence!
